The human body is designed to be healthy. The primary system in the body which coordinates health is the nervous system. The healthy function of every cell, every system, every organ is dependent upon the integrity of the nervous system. The bones of the skull and vertebrae of the spine house and protect the central nervous system.

From the birth process until the present, events have occurred in your life which may have caused interference and damage to this delicate system. Physical, emotional and chemical stresses common to our contemporary lifestyles can result in misalignment and damage to the spinal column. This interference is called the Vertebral Subluxation Complex.

The following form will help reveal the causes of Vertebral Subluxation which interfere with the optimal function of your nervous system and therefore impair your inborn health and well-being.

**Patient Authorization regarding chiropractic care being provided in
an “open adjusting” environment**

It is the practice of this office to provide chiropractic care in an “open adjusting” environment. “Open adjusting” involves several patients being seen in the same adjusting room at the same time. Patients are within sight of one another and some ongoing routine details of care are discussed within earshot of other patients and staff. This environment is used for ongoing care and is NOT the environment used for taking patient histories, performing examinations or presenting reports of findings. These procedures are completed in a private, confidential setting.

We are requesting this authorization of you due to various interpretations under federal law with respect to what is know as an “incidental disclosures” of health information. It is our view that the kinds of matters related in an “open adjusting” environment are incidental matters, in the event you or someone else would not agree with us we are providing this disclosure.

The use of this format is intended to make your experience with out office more efficient and productive as well as to enhance your access to quality health care and health information. If you choose not to be adjusted in an open-adjusting environment other arrangements will be made for you. Your decision will have no adverse effect on you care from our office or on your relationship with our staff.

Your signature indicates your authorization of this activity.
